Top tips for getting your bill processed first time

We have reviewed the most common mistakes made when submitting work to create these tips. These tips will help you get your work processed the first time it is submitted. If you want more guidance or CCMS training material please visit the [CCMS training website](#).

- When submitting your bill ensure Counsel has sufficient cost allocation before submitting. You can do this by checking the account summary screen.
- If you are submitting a bill in a FAS escape cases do not submit your bill before the solicitors. This will cause delays in the processing of your bill and of payment.
- In high cost cases there must be a restriction placed on the case to claim events and this will happen only after the LAA have agreed a contract.
- When you are entering your bill in CCMS, If the matter escapes codified rates then remove codified rates section and enter the hourly rate in the following section.
- Do not use CCMS as a case management system, it is a costs submission system only and should work alongside your own records. This will help avoid any confusion.
- You can export your bills from your case management system and upload to CCMS. This can be done using the [Bulk Claim upload facility](#).
- We strongly recommend that advocates ensure they have been given access to the case on CCMS as soon as they have been instructed by the provider and that an individual cost limit has been authorised. You can [request access](#) to a certificate from the Providers.
- If a Counsel has moved to your chambers recently it is your chambers responsibility to contact [provider records](#) and inform them of the change. Until you do the counsel will still be linked to their old chambers on CCMS and you will be unable to bill on their behalf.
